WILL CLOSE DOWN HONERINE MINE

Coming Annual Session of Stockholders Will Determine Property's Future.

fairs to the Closing Down Point.

By the close of the present month the affairs of the Honerine Mining and Milling company will have assumed such shape that a complete cessation of activity, both in the mine and the mill at Stockton will be possible. That such was the programme to be followed by this

the programme to be followed by this organization was the word that came from Stockton Wednesday morning. No one in Salt Lake could be found to deny or affirm the rumor, and such officials as were seen by The Tribune yesterday were not willing to enter into a discussion of the Honerine affairs from any standpoint.

It is certain, however, that the management is closing down the mine and mill as quickly as possible, and in less than two weeks the machinery will be cold and the mine workings deserted. That this condition will hardly continue long is the general consensus of opinion among the friends of the company. They point out that the directors recently were in session in this city, and an annual stockholders' meeting was called for the last of the coming month. At this session of the shareholders the question of the future of the Honerine property will be brought up and determined one way or the other.

The present management desires naturally to place the

or the other.

The present management desires naturally to place the company upon a paying basis, but there is a considerable debt hanging over the company, which the present officials do not seem able to wipe from off the slate by shipments from the mine. Just what the trouble is, whether it is the lack of ore or the lack of proper quality of the ore, will be brought out during the coming session, and everyone, of course, is in hopes

brought out during the coming session, and everyone, of course, is in hopes that this property at Stockton, long considered one of the great lead-silver mines of the West, will yet achieve results that were expected a year or less ago.

In closing down the Honorine property there are other interests that will suffer from lack of power. These are the Southport, Honerine Extension and others, all which are on the high road to splendid results in their respective boundary lines. There is too much at stake for the Honerine to close down permanently, and no doubt all will be done that is possible to bring order back to the company and its affairs.

LUDWIG STILL SENDS IN VERY RICH ORE

Just for the sake of illustrating the character of settlements the local management of the Nevada Douglas Copper company is getting each week for Ludwig red metal ores, there could be seen Wednesday at this office a check for \$1357.06. This check represents the amount smelter-net the Nevada Louglas company got for the last car received in the-local market. The car contained ore that averaged 16.11 per cent copper to the ton, with the silica and iron just about evenly balanced. This rock does not represent by any manner of means the richest ore had in the Ludwig at Yerington. All the shipments now coming in are the result of development work only, thus making the record of shipments all the more unique and gratifying. Mine reports from the Nevada Douglas property are good reading in spite of their monotonous recital of ores being in each and every working upon the great acreage within this company's boundary lines. On the 550-foot level of the Ludwig the management is still working in

lines. On the 550-foot level of the Ludwig the management is still working in the rich chute of chalcocite ore, with no end or limit of the chute yet in sight. The winze going down from the 550-foot level is still in rich ore, while the workings upon the 550-foot level are in either first or second class rock. Work upon the 400-foot level still continues to show fine results.

the 400-foot level still continues to show fine results.

In the deep tunnel of the Nevada Douglas original group, drift No. 1 shows a full face of copper ore. The shaft on the Casting Copper claim is pushing down through chalcopyrite of splendid grade. All over the property there is nothing but good news to send out, and the Salt Lakers who are in control of this company deem the permanency of the proposition easily assured in every way.

Boston Copper Market.

Boston Copper Market.

James A. Pollock & Co., bankers and brokers. 6 West Second South street, furnish the following, received over their private wire, yesterday afternoon:

Boston News Bureau—Cananca. Mex., Sept. 24—A smelter expert, who has just concluded a several days' visit to the plant of Greene-Cananca, states that the rehabilitation which has been going on since early in the year, and which will be completed in November, will put this smelter in the best condition that it is possible to be on the present site, the area of which is so limited as to prevent the installation of much automatic equipment that could be used to large advantage in reducing operation forces. It must be remembered that Col. Green selected the present smelter site with a view of handling 400 tons of ore a day at the outside limit. Since that time, seven years ago, the ore handled mainly on this site has been increased to about 3100 tons. In the room that he found available Smelter Superintendent Charles F. Shelby is given credit for having installed during the last six months many interesting new mechanical devices which are proving very valuable. Previous to his departure for the East last week. Col. W. C. Greene went through the wines, later stating that they were in the best shape known in their history. Regarding the new smelter, he said that the plans were finished and erection work would commence within a few months.

New York wires: The Greene Gold and Silver company has discontinued the four per cent semi-annual preferred dividend.

FREIGHT AUTOS WILL BE GIVEN A TRIAL

Tri-Metallic Mining Company of Freiburg Needs Better Shipping Means.

Mr. E. J. Jagger, a banker and promment business man of Yakima, Wash. and president of the Tri-Metallo Mining company of Freiburg, Lincoln county, Nev., is stopping at the Wilson hotel. He is here to consult with Mr. N. A. Doney. who is here from the mine, in regard to placing freight automobiles upon the road for the transportation of the ore from the Freiburg mines to the smelters. Mr. Doney is perfectly familiar with the route as well as the camp, being the man who recently brought the old district at Freiburg to the front. Experts leave here in a few days with the president and man-ager above mentioned, accompanied with ager above mentioned, accompanied with prominent smelter men, to look over the camp in regard to the amount, grade, and character of the ore there.

A carload of ore from the camp which will net better than \$200 per ton is now on the way here. The crosscut at the bottom of the shaft in the Tri-Metalic mine has been driven ten feet in solid ore of very high grade, and is not yet through the ledge.

With better facilities for the transportation of the rich shipping ore, of which there is a vast amount, the district will become a large producer and the camp one of the most important in the State of Nevada.

If he freight automobiles are a success, as it is believed they will be, the transportation question will be practically settled for a time, and will subsequently be permanently assured by a branch ratiway from the San Pedro, Los Angeles & Salt Lake line.

PROFIT IN COPPER AT FIFTEEN CENTS

Utah Copper and Boston Con. Can Both Make Very Fine Earnings.

SOME FIGURES THAT INTEREST ARE GIVEN

So Far Utah Copper Has the Better Earning of Two Companies.

For the past two weeks the Engineering and Mining Journal has had some extremely interesting and timely articles on the camp of Bingham and the new concentrating plants of the Utah Copper and the Boston Consolidated companies at Garfield. The figures that are there given regarding saving, costs of production, etc., have not been available until the present time, and since appearing local circles with a propensity for figuring costs, percentages and such like have been busy with the pencil. The results secured are very interesting, and illustrate that even 15-cent copper will hardly darken the usefulness of two great Utah propositions which are destined to make history for the State and the red metal industry. In the first place, it is shown in the above mentioned journal that the Utah Copper company when in full swing will be producing \$5,300,000 pounds of copper per annum. It has been stated that the cost of production will be in the vicinity of 6 cents a pound, owing to the more precious metallic contents of the porphyry ore. But giving plenty of lee-way to this organization, and stating that it will produce its copper at a cost of 8 cents are pound, it will have a net profit of 7 cents a pound with the metal at 15 cents. This means an annual earning per share of \$6, or at the rate of about 30 per cent upon the present valuation of the stock.

The Boston Consolidated company with the first section of its concentrating plant at Garfield, or with a capacity of 3000 tons per day, will produce 23,300,000 pounds of copper per year at practically the same rate of cost as the Utah Copper company. This will allow this company to earn \$1,631,000 per annum, or \$2.60 per share, which is about 14 percent on the present market valuation of the stock.

Of course, everyone hopes and expects copper to land permanently above 15 cents regarding saving, costs of production, etc., have not been available until the present

of the stock.

Of course, everyone hopes and expects copper to land permanently above 15 cents a pound, but owing to the other prectous mineral contents of Utah copper ores the cost of copper production is so small that a 15-cent copper market still will allow a fine profit for the producer.

Ore Shipments.

The Pioneer sampler on Wednesday re-leased the following number of cars of ore: Utah, 10 Nevada, 2. The Taylor and Brunton company re-leased the following: Utah, 12: Nevada,

Ore and Bullion. The ore and bullion receipts for Wednesday, given by McCornick & Co., were as follows: Ore, \$168,000; bullion, \$67,000.

The Metal Market.

The metal quotations for Wednesday, posted by McCornick & Co., were as follows: Silver, 67½c; lead, \$4.75; copper castings, 14gc.

Mining Notes. J. M. Reynolds and Robert Corlinski have returned from the Hecla property in Beaver county.

Peter Porter, manager of the Monte-zuma company of Bingham, was in that camp Wednesday, looking over the mine L. N. Morrison leaves tonight for the purpose of making an inspection of the Indian Queen Consolidated property in Beaver county.

Word from Goldfield yesterday was to the effect that on the Eagle's Nest prop-erty at Fairview, some very high grade rock had been found on the lower levels, thus accounting for the sudden jump in the stock.

In spite of the numerous applications that have been made for passes upon the Nevada Hills railroad, the officials of the company are proceeding with their plans undismayed. Secretary Clark yesterday stated that he had received the two hundred and thirteenth application for free transportation over the line.

PIOCHE BRUSHING UP FOR SPLENDID ERA

Camp Is Placing Improvements as Quickly as Money Can Do Work.

All Ploche, realizing the necessity of having the house in order for the magnificent era of prosperity that is bound to follow the arrival of the railroad line, is doing its utmost to hurry along improvements of each sort and character. These improvements include new rooming

provements of each sort and character. These improvements include new rooming and boarding houses, and all other conveniences so necessary for a booming and productive mining camp. This is the word brought from the Pioche camp by Joseph Free, the well-known mining man of that part of Nevada. Mr. Free states that every possible space in the town is filled with visitors all on business bent, and even the business offices are being surrendered at night to cots filled with the guests of the camp.

Mr. Free is prominently interested in the Pioche-Demijoin property, which, he states, will become a regular shipper of ore as soon as the camp is tied to the outside world by steel rails. The company has a fine lot of rich rock awaiting disposition, and Mr. Free has secured a great many ore sacks so that sacking this rock can begin as soon as they are received at the mine. He expects this organization to be among the first and most faithful of Ploche shippers to the local ore market. He states that there recently has been a very fine strike made upon this group which will add greatly to the possibilities of the property.

Mr. Free, with several Sailt Lakers, including Alex Colbath, John T. Hodson, W. Scott Crismon, Mr. Jones and Mr. Cunningham, has secured a group of ten claims in the Ploche camp known as the Milwaukee property. A company will be formed to be known as the Ploche-Milwaukee Mining company to take over and operate this property, and active work will begin as soon as possible. The Milwaukee adjoins the Mendah on the cast, and the Last Chance property on the north. The new owners have ordered a survey. While not stating the consideration for the deal, it was a most substantial one, for the property is considered one of the coming producers of that section.

MOTHERS Of Skin-Tortured, Disfigured Babies Should Know

VALUABLE INFORMATION FOR WOMEN.

Thousands of women, from the mis-taken sense of delicacy, are passing the springtime and summer of their lives in silent suffering. From false modesty they conceal their pains and untold suffering, instead of seeking for a means of recovery to Health and Happiness. Any reliable druggist can fill this, and it works miracles in all Diseases of Women.

Compound Ferdo
Sherry Wine 4 ozs.

Take one teaspoonful three or four times a day. This is the formula of the great Female Remedy, known as Compound Ferdo No. 1. If your druggist cannot prepare it for you, enclose one dollar to the Ferdon Medicine Co. Los Angeles, California, and they will send you a large bottle, and also make you a present of a free trial treatment of Compound Ferdo No. 2, which is a suppository, and should be used in connection with Compound Ferdo No. 1. Address all letters and money orders to Ferdon Medicine Co., Los Angeles, California.
